# Lesson Study – Blackboard Map

Story: With the defeat of the Spanish Armada in 1588, England knew it had the capability to expand its empire and look west to the open seas in order to step onto the world stage and colonize other lands. Colonies meant wealth, and wealth came in many forms. Earlier Spanish land acquisitions in South America brought great wealth in the form of gold. For England, colonization in the New World meant the same opportunity. Colonization was no easy task due to the difficult journey across the Atlantic and the rugged land they'd be forced to inhabit.

| **Problem:** How were early colonists able to successfully inhabit the new land? | **Survival Needs:**
- Farming
- Living
- Workers
- Shelter | **Successful Decisions**

Independent Work "Jamestown Web Quest" | **Hinge Question** | **Jamestown's Actual Decisions**

Presentation of the "Report Card" for colonists' choices | **Worked / Didn't** | **Evaluation:** Evaluate the decisions made by the Jamestown Colony and explain how they either helped or hindered the success of the settlement? |

Of the different scenarios on the board, which one allows for the greatest amount of success?

Student Work
